Volume contents

Number 1 January 1996

1 *Ary A. Hoffmann, David Clancy and Jacinta Duncan*
Naturally-occurring *Wolbachia* infection in *Drosophila simulans* that does not cause cytoplasmic incompatibility

9 *Jean-Luc Da Lage, Albert Klarenberg and Marie-Louise Cariou*
Variation in sex-, stage- and tissue-specific expression of the amylase genes in *Drosophila ananassae*

19 *André S. Gilburn and Thomas H. Day*
The evolution of female choice when the preference and the preferred trait are linked to the same inversion system

28 *Huw M. Thomas and Barry J. Thomas*
Meiosis of triploid *Lolium*. III. Synaptonemal complex formation in the two inverse autoallotriploids of *L. temulentum* and *L. multiflorum*, TTM and TMM

36 *Mark C. Keese*
Feeding responses of hybrids and the inheritance of host-use traits in leaf feeding beetles (Coleoptera: Chrysomelidae)

43 *James T. Cronin and Donald R. Strong*
Genetics of oviposition success of a thelytokous fairyfly parasitoid, *Anagrus delicatus*

55 *Gladys Ruiz-Dubreuil, Barrie Burnet, Kevin Connolly and Peter Furness*
Larval foraging behaviour and competition in *Drosophila melanogaster*

65 *Thomas W. Chapman and Steven C. Stewart*
Extremely high levels of inbreeding in a natural population of the free-living wasp *Ancistrocerus antilope* (Hymenoptera: Vespidae: Eumeninae)

70 *E. Rodríguez Iñigo, B. Fernández-Calvín, J. Capel and C. García de la Vega*
Equilocality and heterogeneity of constitutive heterochromatin: *in situ* localization of two families of highly repetitive DNA in *Dociostaurus genei* (Orthoptera)

77 *Anna Rita Rossi, Donatella Crosetti, Ekaterina Gornung and Luciana Sola*
Cytogenetic analysis of global populations of *Mugil cephalus* (striped mullet) by different staining techniques and fluorescent *in situ* hybridization

83 *Timothy P. Holtsford*
Variation in inbreeding depression among families and populations of *Clarkia tembloriensis* (Onagraceae)

92 *A. M. Deiana, E. Coluccia, A. Milia and S. Salvadori*
Supernumerary chromosomes in *Nephrops norvegicus* L. (Crustacea, Decapoda)

100 *Kjell Larsson*
Genetic and environmental effects on the timing of wing moult in the barnacle goose

108 Book reviews

Number 2 February 1996

111 *A. F. Raybould, J. Goudet, R. J. Mogg, C. J. Gliddon and A. J. Gray*
Genetic structure of a linear population of *Beta vulgaris* ssp. *maritima* (sea beet) revealed by isozyme and RFLP analysis

118 *L. M. Cook and G. Gao*
Test of association of morphological variation with heterozygosity in the snail *Cepaea nemoralis*

124 *Philippe Borsa and Christine Coustau*
Single-stranded DNA conformation polymorphism at the *Rdl* locus in *Hypothenemus hampei* (Coleoptera: Scolytidae)

130 *Philippe Borsa and Finn Kjellberg*
Experimental evidence for pseudoarrhenotoky in *Hypothenemus hampei* (Coleoptera: Scolytidae)

136 *Xun Gu and Anthony J. Zera*
Quantitative genetics of juvenile hormone esterase, juvenile hormone binding and general esterase activity in the cricket *Gryllus assimilis*

143 *Foster Levy, Janis Antonovics, John E. Boynton and Nicholas W. Gillham*
A population genetic analysis of chloroplast DNA in *Phacelia*

156 *Hélène Muranty*
Power of tests for quantitative trait loci detection using full-sib families in different schemes

166 *D. de Vienne, J. Burstin, S. Gerber, A. Leonardi, M. Le Guilloux, A. Murigneux, M. Beckert, N. Bahrman, C. Damerval and M. Zivy*
Two-dimensional electrophoresis of proteins as a source of monogenic and codominant markers for population genetics and mapping the expressed genome

178 *Derek A. Roff and Michael J. Bradford*
Quantitative genetics of the trade-off between fecundity and wing dimorphism in the cricket *Allonemobius socius*

186 *G. H. Jones, K. A. Khazanehdari and B. V. Ford-Lloyd*
Meiosis in the leek (*Allium porrum* L.) revisited. II. Metaphase I observations

192 *G. S. Oxford, T. J. Crawford and K. Pernyes*
Why are capitulum morphs associated with other characters in natural populations of *Senecio vulgaris* (groundsel)?

198 *Hans-Peter Piepho*
Comparing cultivar means in multilocation trials when the covariance structure is not circular

204 Book reviews

Number 3 March 1996

207 *Marjorie A. Asmussen and Christopher J. Basten*
Constraints and normalized measures for cytonuclear disequilibria

215 *Sergio Comincini, Massimo Sironi, Claudio Bandi, Cecilia Giunta, Michele Rubini and Francesco Fontana*
RAPD analysis of systematic relationships among the Cervidae

222 *Maria Izabel Barnez Pignata and José Alexandre Felizola Diniz-Filho*
Phylogenetic autocorrelation and evolutionary constraints in worker body size of some neotropical stingless bees (Hymenoptera: Apidae)

229 *Masaya Matsumura*
Genetic analysis of a threshold trait: density-dependent wing dimorphism in *Sogatella furcifera* (Horváth) (Hemiptera: Delphacidae), the whitebacked planthopper

238 *G. S. Oxford and R. G. Gillespie*
Genetics of a colour polymorphism in *Theridion grallator* (Araneae: Theridiidae), the Hawaiian happy-face spider, from Greater Maui

249 *G. S. Oxford and R. G. Gillespie*
Quantum shifts in the genetic control of a colour polymorphism in *Theridion grallator* (Araneae: Theridiidae), the Hawaiian happy-face spider

257 *G. S. Oxford and R. G. Gillespie*
The effects of genetic background on the island-specific control of a colour polymorphism in *Theridion grallator* (Araneae: Theridiidae), the Hawaiian happy-face spider

267 *J. R. Michaux, M.-G. Filippucci, R. M. Libois, R. Fons and R. F. Matagne*
Biogeography and taxonomy of *Apodemus sylvaticus* (the woodmouse) in the Tyrrhenian region: enzymatic variations and mitochondrial DNA restriction pattern analysis

278 *F. H. D. van Batenburg and E. Gittenberger*
Ease of fixation of a change in coiling: computer experiments on chirality in snails

287 *Andrea L. Case, Elizabeth P. Lacey and Robin G. Hopkins*
Parental effects in *Plantago lanceolata* L. II. Manipulation of grandparental temperature and parental flowering time

296 *Parminder S. Virk, Brian V. Ford-Lloyd, Michael T. Jackson, Harpal S. Pooni, Tomas P. Clemono and H. John Newbury*
Predicting quantitative variation within rice germplasm using molecular markers

305 *J.-C. Simon, E. Carrel, P. D. N. Hebert, C. A. Dedryver, J. Bonhomme and J.-F. Le Gallic*
Genetic diversity and mode of reproduction in French populations of the aphid *Rhopalosiphum padi* L.

314 Book reviews

Number 4 April 1996

317 *P. Spruell and G.H. Thorgaard*
SINE sequences detect DNA fingerprints in salmonid fishes

325 *Barbara L. Apostol, William C. Black IV, Paul Reiter and Barry R. Miller*
Population genetics with RAPD–PCR markers: the breeding structure of *Aedes aegypti* in Puerto Rico

335 *M.R. Ahuja*
Genetic nature of a nontumour mutant isolated from tumour-prone amphidiploid *Nicotania glauca-langsdorffii* (GGLL): a critical assessment

346 *Mariana Matrajt, Viviana Confalonieri and Juan Vilardi*
Parallel adaptive patterns of allozyme and inversion polymorphisms on an ecological gradient

355 *Ignacio Marín and Antonio Fontdevila*
Evolutionary conservation and molecular characteristics of repetitive sequences of *Drosophila koepferae*

367 *R.J. Brooks, A.M. Tobias and M.J. Lawrence*
The population genetics of the self-incompatibility polymorphism in *Papaver rhoeas*. XI. The effects of limited pollen and seed dispersal, overlapping generations and variation in plant size on the variance of *S*-allele frequencies in populations at equilibrium

377 *Montgomery Slatkin and Laurent Excoffier*
Testing for linkage disequilibrium in genotypic data using the Expectation-Maximization algorithm

384 *J.F.Y. Brookfield*
Genetic evidence for repression of somatic P element movements in *Drosophila melanogaster* consistent with a role for the KP element

392 *Carlos Juan, Pedro Oromi and Godfrey M. Hewitt*
Phylogeny of the genus *Hegeter* (Tenebrionidae, Coleoptera) and its colonization of the Canary Islands deduced from Cytochrome Oxidase I mitochondrial DNA sequences

404 *Gonzalo Alvarez and Carlos Zapata*
Measuring selective effects of modifier gene polymorphisms on the *Bare* locus of *Drosophila subobscura*

412 *Alfred E. Szmidt, Xiao-Ru Wang and Meng-Zhu Lu*
Empirical assessment of allozyme and RAPD variation in *Pinus sylvestris* (L.) using haploid tissue analysis

421 Referees

422 Errata

424 Book reviews

Number 5 May 1996

427 *Massimo Pigliucci and Carl D. Schlichting*
Reaction norms of *Arabidopsis*. IV. Relationships between plasticity and fitness

437 *Jes Johannesen and Volker Loeschcke*
A hierarchical analysis of genetic structure and variability in patchily distributed coexisting *Chiastocheta* species (Diptera: Anthomyiidae)

449 *Hong-Wen Deng*
Environmental and genetic control of sexual reproduction in *Daphnia*

459 *R. W. Doerge and Ahmed Rebaï*
Significance thresholds for QTL interval mapping tests

465 *Peter Arctander, Pieter W. Kat, Rashid A. Aman and Hans R. Siegismund*
Extreme genetic differences among populations of *Gazella granti*, Grant's gazelle, in Kenya

476 *Masashi Ohara, Haruko Takeda, Yoko Ohno and Yoshiya Shimamoto*
Variations in the breeding system and the population genetic structure of *Trillium kamtschaticum* (Liliaceae)

485 *Srinivas Kambhampati, Peter Luykx and Christine A. Nalepa*
Evidence for sibling species in *Cryptocercus punctulatus*, the wood roach, from variation in mitochondrial DNA and karyotype

497 *Adam D. Richman, Marcy K. Uyenoyama and Joshua R. Kohn*
S-allele diversity in a natural population of *Physalis crassifolia* (Solanaceae) (ground cherry) assessed by RT-PCR

506 *Janine W. A. M. Pijls, Hans J. van Steenbergen and Jacques J. M. van Alphen*
Asexuality cured: the relations and differences between sexual and asexual *Apoanagyrus diversicornis*

514 *Conrad A. Matthee and Terence J. Robinson*
Mitochondrial DNA differentiation among geographical populations of *Pronolagus rupestris*, Smith's red rock rabbit (Mammalia: Lagomorpha)

524 *S. Minelli, P. Moscariello, M. Ceccarelli and P. G. Cionini*
Nucleotype and phenotype in *Vicia faba*

531 *Rogério Gribel and Richard J. Abbott*
Genetics of cytosolic phosphoglucose isomerase (PGI) variation in the Amazonian tree *Pseudobombax munguba* (Bombacaceae)

539 *Piet Spaak*
Temporal changes in the genetic structure of the *Daphnia* species complex in Tjeukemeer, with evidence for backcrossing

549 Book reviews

Number 6 June 1996

551 *A. Apostolidis, Y. Karakousis and C. Triantaphyllidis*
Genetic divergence and phylogenetic relationships among *Salmo trutta* L. (brown trout) populations from Greece and other European countries

561 *Denis Couvet and Joëlle Ronfort*
Relationship between inbreeding depression and selfing: the case of intrafamily selection

569 *Jinliang Wang*
Inbreeding coefficient and effective size for an X-linked locus in nonrandom mating populations

578 *Michelle Waycott, Diana I. Walker and Sidney H. James*
Genetic uniformity in *Amphibolis antarctica*, a dioecious seagrass

586 *Teresa Cuellar, Eric Belhassen, Begoña Fernández-Calvín, Juan Orellana and Jose L. Bella*
Chromosomal differentiation in *Helianthus annuus* var. *macrocarpus*: heterochromatin characterization and rDNA location

592 *Anna R. Malacrida, Carmela R. Guglielmino, Patrizia D'Adamo, Cristina Torti, Fulvia Marinoni and Giuliano Gasperi*
Allozyme divergence and phylogenetic relationships among species of tephritid flies

603 *Klea Lamnissou, Michael Loukas and Eleftherios Zouros*
Incompatibilities between Y chromosome and autosomes are responsible for male hybrid sterility in crosses between *Drosophila virilis* and *Drosophila texana*

610 *M. J. Lawrence*
Number of incompatibility alleles in clover and other species

616 *Samantha Messier and Jeffry B. Mitton*
Heterozygosity at the malate dehydrogenase locus and developmental homeostasis in *Apis mellifera*

623 *Kayri Havens and Lynda F. Delph*
Differential seed maturation uncouples fertilization and siring success in *Oenothera organensis* (Onagraceae)

633 *J. A. Herrera, M. D. López-León, J. Cabrero, M. W. Shaw and J. P. M. Camacho*
Evidence for B chromosome drive suppression in the grasshopper *Eyprepocnemis plorans*

640 *Xavier Rognon, Martine Andriamanga, Brendan McAndrew and René Guyomard*
Allozyme variation in natural and cultured populations in two tilapia species: *Oreochromis niloticus* and *Tilapia zillii*

651 *M. D. López-León, J. Cabrero and J. P. M. Camacho*
Negatively assorted gamete fertilization for supernumerary heterochromatin in two grasshopper species
